The Lost World of Atlantis

Answer Key

Geografia (Brazilian curriculum) · Year 3 · 7 challenges · 7 badges · 70 pearls

Check your answers, Explorer Isabel! The answers are in Portuguese, like your test; the explanations are in English. If an answer is different, go back to the mission page, read it again and try one more time.

Challenge 1 · The Water Portal

Reward: Water Guardian Badge · +10 pearls *(page 4)*

Task: Tick V (true) or F (false) for 1 to 4, then read the water chart (5 to 8).

Item	Answer	Why
1. A água gera energia nas hidrelétricas.	V	the force of water turns turbines and generators
2. A água é habitat de muitos seres vivos.	V	fish live in water; frogs lay eggs in it
3. A maior parte da água do planeta é doce.	F	97.5% is salt water
4. Toda a água do planeta pode ser bebida.	F	only drinking water (potável) is safe
5. A água salgada é:	97,5%	the big dark slice of the chart
6. A maior parte da água doce está:	nas geleiras e neves	68.9% of fresh water is frozen
7. Os rios e lagos têm só:	0,3%	the tiny yellow slice
8. A água doce embaixo da terra é chamada de:	águas subterrâneas	29.9% of fresh water is underground

Why: Most water on Earth is salty. Fresh water is only 2.5%, and most of it is frozen in glaciers. That is why we must take care of it!

Challenge 2 · The Cloud Tower

Reward: Cycle Master Badge · +10 pearls *(page 6)*

Task: Tick the state of water (1 to 5) and the step of the water cycle (6 to 10).

Item	Answer	Why
1. gelo	sólido	frozen water is solid
2. vapor da panela	gasoso	boiling water turns into vapour (gas)
3. água do rio	líquido	water that flows is liquid
4. neve	sólido	snow is frozen water
5. umidificador	gasoso	it puts vapour into the air
6. O Sol aquece a água e ela vira vapor	evaporação	liquid turns into gas
7. O vapor esfria e forma as nuvens	condensação	gas turns back into liquid drops
8. Cai como chuva, neve ou granizo	precipitação	water falls back to Earth
9. Entra no solo e abastece os aquíferos	infiltração	water goes into the soil
10. As plantas liberam vapor	evapotranspiração	like the bag on the plant

Why: Water changes state: solid, liquid and gas. The Sun makes it evaporate, the vapour cools and makes clouds, the rain falls and part of it goes into the soil.

Challenge 3 · The Crystal Fountain

Reward: Drinking Water Badge · +10 pearls *(page 9)*

Task: Tick the answers about drinking water (1 to 7) and read the sketch map on page 8 (8 to 11).

Item	Answer	Why
1. Água potável é a que:	pode ser bebida	safe for people to drink
2. A ETA serve para:	tratar a água	the water treatment station cleans the water
3. A sujeira forma flocos e vai para o fundo:	decantação	heavy dirt sinks to the bottom
4. Areia e carvão seguram a sujeira:	filtração	the filter holds the small dirt
5. No final, a água recebe:	cloro e flúor	chlorine cleans; fluoride protects teeth
6. A água usada (esgoto) é tratada na:	ETE	the sewage treatment station
7. Sem tratamento, a água deve ser:	fervida ou filtrada	boil or filter it before drinking
8. Croqui é um lugar visto:	de cima	a simple drawing seen from above
9. Os símbolos são explicados na:	legenda	the legend explains the symbols
10. O símbolo das casas é:	quadrado laranja	look at the legend
11. A ETA fica perto do:	rio	water is taken from the river

Why: Water is taken from a river, cleaned at the ETA, stored in reservoirs and sent to the houses. After we use it, it becomes sewage and is cleaned at the ETE. A sketch map (croqui) shows a place seen from above, with symbols and a legend.

Challenge 4 · How is the water?

Reward: Clean River Badge · +10 pearls *(page 11)*

Task: Tick use or pollution (1 to 6), good or bad use (7 to 10), then 11 and 12.

Item	Answer	Why
1. pessoa se hidratando	uso	drinking water
2. indústria despejando resíduos	poluição	chemicals in the river
3. lixo descartado na lagoa	poluição	trash pollutes the water
4. pessoa pescando no mar	uso	fun and food
5. água contaminada por mina	poluição	mining pollutes water
6. refeição sendo preparada	uso	cooking
7. fechar a torneira ao escovar os dentes	bom	saves water
8. tomar banho bem demorado	mau	wastes water
9. usar o vaso sanitário como lixeira	mau	each flush wastes water
10. reaproveitar a água da máquina de lavar	bom	use it to clean the yard
11. Beber água contaminada pode causar:	diarreia e cólera	also hepatitis A
12. Qual NÃO polui a água?	reciclar o plástico	recycling is a solution

Why: Polluted water hurts animals, plants and people. We can help: close the tap, take short showers and never throw trash in rivers or in the toilet.

Challenge 5 · The Shell Market

Reward: Smart Shopper Badge · +10 pearls *(page 13)*

Task: Tick the category (1 to 6), read the chart (7) and tick the 3 smart choices (8).

Item	Answer	Why
1. lanche no intervalo	alimentação	food
2. comprar uma roupa	vestuário (e objetos)	clothes
3. comprar um celular	vestuário (e objetos)	electronics are objects
4. ir ao dentista	serviços	a service someone offers
5. ingresso de cinema	lazer	fun
6. ir à escola (ensino)	serviços	teaching is a service
7. Todos os dias:	refeição	6 blocks on the chart
8. Atitudes conscientes:	comprar só o necessário; consertar; doar	buy only what you need, fix and donate

Why: We consume food, clothes and objects, services and fun. Being a smart shopper means buying only what you need, fixing things and donating what you do not use.

Challenge 6 · The Bin Workshop

Reward: Three Rs Badge · +10 pearls *(page 15)*

Task: Tick the right bin (1 to 6), the right R (7 to 9) and what compost makes (10).

Item	Answer	Why
1. lata de refrigerante	amarela	metal
2. jornal velho	azul	paper
3. garrafa PET	vermelha	plastic
4. pote de vidro	verde	glass
5. casca de banana	marrom	food scraps
6. guardanapo usado	cinza	cannot be recycled
7. Guardar alimentos no pote de vidro	reutilizar	use it again
8. 2 garrafas grandes no lugar de 6 latas	reduzir	less packaging, less trash
9. Plástico triturado vira garrafa nova	reciclar	a brand new product
10. A compostagem transforma em:	adubo	food for plants

Why: Each kind of trash has a bin color. Reduce, reuse and recycle! Food scraps can become compost (adubo) for plants.

Challenge 7 · The Waste Valley

Reward: Right Place Badge · +10 pearls *(page 17)*

Task: Tick how long each material takes to break down (1 to 5) and where trash goes (6 to 10).

Item	Answer	Why
1. plástico	450 anos	a very long time
2. vidro	1 milhão de anos	the longest of all
3. papel	2 a 6 semanas	quick
4. material orgânico	1 a 6 meses	becomes compost
5. metal	50 a 200 anos	a long time
6. Solo impermeável, manta e pedra	aterro sanitário	trash is kept safely
7. Contamina solo, água e ar; atrai ratos	lixão	the old, unsafe way
8. Líquido escuro de cheiro ruim	chorume	comes from rotting trash
9. Pilhas e celulares velhos	o descarte correto	they can pollute
10. Quanto mais consumimos	mais lixo produzimos	more shopping, more trash

Why: Every material takes a different time to break down. Trash should go to a sanitary landfill, never to an open dump. Batteries and old phones need special disposal.

Mission complete

You lit all 7 portals of Atlantis! You are ready for November 12. Tell someone at home one way to save water and one way to make less trash!
