Master Isabel and the

LEGEND MASTERS

Math · Year 3 · Unit 8: Exploring Fractions · Unit 6: Measurement

7 Legend Masters are waiting for you. Win the duels with Math!

Master's name:

TEST: NOVEMBER 18 • READY? DUEL!

Your team and how the Legend League works

MASTER PENA

The wise leader. She explains every duel.

BILU

Your partner. Funny and hungry: he loves pizza!

TICO

Small and curious. He asks LOTS of questions.

How it works: 7 Legend Masters, 7 duels. Do the actions MOVE!, FIND!, TALK!, TRY IT! · **Tick the boxes to answer.** Each duel won = 1 badge, 10 crystals and a legendary creature on your team!

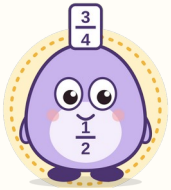

The Legend League: tick the box of each Master you beat!

Partiko

Master Aria

☐

Numerra

Master Theo

☐

Ribbonix

Master Lia

☐

Gemmora

Master Rubi

☐

Calendrix

Master Dias

☐

Thermion

Master Neve

☐

Moedon

Master Cofre

☐

Mission 1: Exploring equal parts

FIND! Find something round at home (a plate, a pizza box). How could you cut it into 4 equal parts? Show Dad!

A WHOLE

is one complete object.

A FRACTION

is an equal part of a whole.

EQUAL PARTS

have the same size.

equal **NOT equal**

One whole can be divided into...

2 parts	3 parts	4 parts	5 parts	6 parts	7 parts	8 parts	9 parts	10 parts
halves	**thirds**	**fourths (quarters)**	**fifths**	**sixths**	**sevenths**	**eighths**	**ninths**	**tenths**

Same fraction, different shapes: a circle, a square or a rectangle cut into 4 equal parts all show fourths. The shape can change, but the fraction stays the same!

MOVE! Fold a sheet of paper in half, then in half again. Open it: how many equal parts? Make a WHOLE circle with your arms, then cut it in HALF with one arm!

★ CHALLENGE 1

1

Duel 1: Master Aria and Partiko

MOVE! Partiko attacks! For each shape, clap if the parts are EQUAL or stomp if they are NOT. Then tick the answer.

Equal parts or not?

1.  ☐ equal ☐ not equal

2.  ☐ equal ☐ not equal

3.  ☐ equal ☐ not equal

4.  ☐ equal ☐ not equal

What are the parts called?

5.  ☐ halves ☐ thirds

6.  ☐ fourths ☐ fifths

7.  ☐ eighths ☐ sixths

8.  ☐ ninths ☐ tenths

9. A fraction is: ☐ any part ☐ an equal part of a whole

10. Fourths are also called: ☐ quarters ☐ halves

REWARD: Equal Parts Badge

 +10 crystals

DUEL WON!

Partiko joins your team. Tick Master Aria on the League map (page 2).

Mission 2: Naming and writing fractions

TALK! A pizza is cut into 4 equal slices and Bilu eats 3. How much did he eat? Guess with Dad!

$$\frac{3}{4}$$

NUMERATOR (top number)
how many equal parts are counted (shaded)

DENOMINATOR (bottom number)
how many equal parts are in the whole. It helps us NAME the fraction!

We say...

2 → halves
3 → thirds
4 → fourths or quarters
5 → fifths
6 → sixths
7 → sevenths
8 → eighths
9 → ninths
10 → tenths

How to name a fraction

1. Look at the whole: are the parts equal?
2. Count ALL the equal parts: the denominator.
3. Count the parts you are talking about: the numerator.
4. Write it and say it: 3/4 = three fourths.

More examples

$\frac{1}{2}$ one half

$\frac{2}{3}$ two thirds

$\frac{3}{4}$ three fourths

$\frac{2}{5}$ two fifths

$\frac{5}{8}$ five eighths

$\frac{7}{10}$ seven tenths

MOVE! NUMERATOR = stand up tall (it is on top). DENOMINATOR = crouch down (it is at the bottom). Dad says one of the two words, faster and faster!

Duel 2: Master Theo and Numerra

MOVE! Numerra shows a fraction! Stand up for the numerator and crouch for the denominator before you tick each answer.

Which fraction is shaded?

1. 

☐ 3/4 ☐ 4/3

2. 

☐ 5/8 ☐ 3/8

3. 

☐ 1/6 ☐ 1/5

4. 

☐ 3/10 ☐ 7/10

Say it in words

5. 2/3 ☐ two thirds ☐ three halves

6. 1/2 ☐ one second ☐ one half

7. 5/8 ☐ five eighths ☐ eight fifths

8. 3/10 ☐ three tens ☐ three tenths

9. In 4/5, the numerator is: ☐ 4 ☐ 5

10. The denominator tells us:

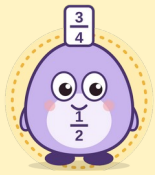

☐ the parts shaded ☐ all the equal parts

REWARD: Fraction Namer Badge

+10 crystals

DUEL WON!

Numerra joins your team. Tick Master Theo on the League map (page 2).

Mission 3: Fractions of a length

TRY IT! Take a strip of paper: it is your WHOLE. Fold it into 4 equal parts and color 1 part. That is one fourth!

1. One whole

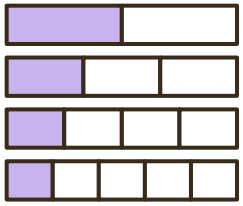

A whole is the entire length.

2. Equal parts

Divide the whole into parts that are equal in length.

3. Fraction names

one half (1/2)
one third (1/3)
one fourth (1/4)
one fifth (1/5)

4. All the parts make the whole

1/4 + 1/4 + 1/4 + 1/4 = 1 whole

4 fourths = 1 whole

1/3 + 1/3 + 1/3 = 1 whole

3 thirds = 1 whole

1/5 + 1/5 + 1/5 + 1/5 + 1/5 = 1 whole

5 fifths = 1 whole

5. Shade a fraction of a length

$\frac{2}{5}$

2 fifths are shaded.
2 = the parts we are talking about (shaded)
5 = all the equal parts in the whole

MOVE! Make a path of 4 equal steps in the hallway: it is your whole. Walk 1/4 (1 step), 2/4, 3/4... and 4/4 = 1 whole! Say each fraction out loud.

★ CHALLENGE 3

1 2 3

Duel 3: Master Lia and Ribbonix

MOVE! Ribbonix stretches! Before each answer, walk the fraction on your 4-step path (or spread your arms for 1 whole).

What fraction is shaded?

1. 

☐ 2/5 ☐ 3/5

2. 

☐ 1/2 ☐ 1/3

3. 

☐ 3/4 ☐ 1/4

4. 

☐ 6/5 ☐ 5/6

Think like a master

5. 4 fourths = ☐ 1 whole ☐ 4 wholes

6. 1/3 + 1/3 + 1/3 = ☐ 3 wholes ☐ 1 whole

7. Fifths in 1 whole: ☐ 4 ☐ 5

8. A chocolate bar has 6 equal pieces. You eat 1 piece. You ate:

☐ 1/6 ☐ 1/5

9. To show a fraction of a length, the parts must be:

☐ different sizes ☐ equal in length

REWARD: Length Master Badge

+10 crystals

DUEL WON!

Ribbonix joins your team. Tick Master Lia on the League map (page 2).

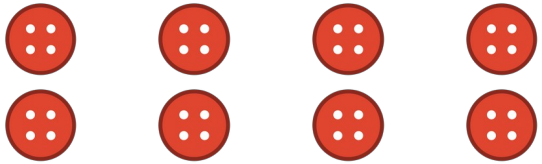

Mission 4: Fractions of a set

FIND! Make a set of 8 things (spoons, socks, toys). How many objects are in the whole set? Show Dad!

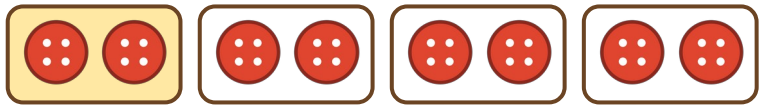

What is a set?

A set is a group of objects. The whole is the entire set.

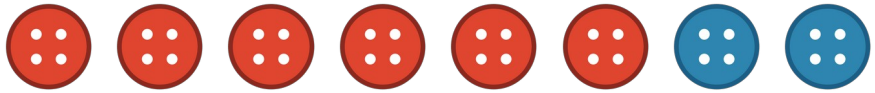

How to find a fraction of a set: 1/4 of 8

1. Count the objects.	2. Look at the fraction.	3. Make equal groups.	4. Count ONE group.
8 in all	the 4 = make 4 equal groups	4 groups of 2	1/4 of 8 = 2

1/4 of 8 = 2

Describing a set with fractions

6 out of 8 buttons are red: 6/8 of the buttons are red.
2 out of 8 buttons are blue: 2/8 are blue.

Another example: 9 fish bowls

7/9 of the fish bowls have a fish.
2/9 are empty.
Also: 1/6 of 12 counters = 2 (6 groups of 2).

MOVE! Share 12 grapes (or LEGO pieces) on 3 plates, the same number on each plate. 1/3 of 12 = ? Run and give one plate to Dad!

★ CHALLENGE 4

1 2 3 4

Duel 4: Master Rubi and Gemmora

MOVE! Gemmora throws gems! Use real objects (spoons, LEGO) to make the equal groups before you tick.

What fraction of the set?

1. What fraction is red?

☐ 5/8 ☐ 3/8

2. What fraction is blue?

☐ 5/8 ☐ 3/8

3. Bowls with a fish?

☐ 2/6 ☐ 4/6

4. What fraction is yellow?

☐ 3/4 ☐ 1/4

Find the fraction of the set

5. 1/4 of 8 = ☐ 2 ☐ 4

6. 1/2 of 10 = ☐ 2 ☐ 5

7. 1/3 of 9 = ☐ 3 ☐ 6

8. 1/6 of 12 = ☐ 6 ☐ 2

9. To find 1/5 of a set, make:

☐ 5 equal groups ☐ 1 big group

10. In a set, the whole is:

☐ one object ☐ the entire set

REWARD: Set Collector Badge

+10 crystals

DUEL WON!

Gemmora joins your team. Tick Master Rubi on the League map (page 2).

Mission 5: Understanding a calendar

TALK! What is today's date? What day of the week is it? Say it the way Canadians write it!

How time is organized

YEAR → MONTHS → WEEKS → DAYS
1 year = 12 months · 1 year = 365 days
1 month has 28, 30 or 31 days
1 week = 7 days
Leap year = 366 days (February has 29 days).

Months of the year

31 days: January, March, May, July, August, October, December
30 days: April, June, September, November
February: 28 days (29 in a leap year)

NOVEMBER 2026

month + year

Sun	Mon	Tue	Wed	Thu	Fri	Sat
1	2	3	4	5	6	7
8	9	10	11	12	13	14
15	16	17	**18**	19	20	21
22	23	24	25	26	27	28
29	30					

Days of the week: Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday. November 2026 starts on a Sunday. The yellow day is your test!

MOVE! Say the 7 days of the week taking 7 steps. Then hop once for each month with 31 days! **Writing a date: November 18th, 2026 (month + date + year, comma before the year) · in Portuguese: 18 de novembro de 2026.**

★ CHALLENGE 5

1 2 3 4 5

Duel 5: Master Dias and Calendrix

MOVE! Calendrix spins the days! Hop once for each answer you are sure about. Use the November calendar on page 11.

Count the time

1. Days in a week:	☐	5	☐	7
2. Months in a year:	☐	12	☐	10
3. Days in a year:	☐	300	☐	365
4. A month with 30 days:	☐	April	☐	March
5. A month with 31 days:	☐	June	☐	July
6. In a leap year, February has:	☐	29 days	☐	31 days

Read and write dates

7. Nov. 18th, 2026 is a:	☐	Wednesday	☐	Friday
8. The day after Friday:	☐	Thursday	☐	Saturday
9. November 2026 starts on a:	☐	Sunday	☐	Monday
10. Ordinal number for 22:	☐	22th	☐	22nd

11. Write the date in English (Canada):

☐ November 18th, 2026 ☐ 18th November 2026

REWARD: **Calendar Keeper Badge**

+10 crystals

DUEL WON!

Calendrix joins your team. Tick Master Dias on the League map (page 2).

Mission 6: Measuring temperature

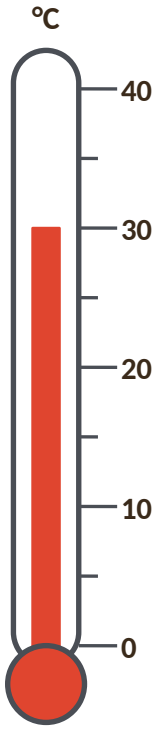

TRY IT! Touch a glass of cold water and a cup of warm water (with Dad!). Which one has a higher temperature?

Temperature

How hot or cold something is.
Tool: thermometer
Units: °C = degrees Celsius
°F = degrees Fahrenheit

Higher number = hotter. Lower number = colder.

The red line stops at 30: it is 30 °C.

Hot or cold?

hot soup

a hot sunny day

cold ice cream

snow: very cold

Choose the right tool and unit

	**LENGTH (how long)**	ruler · mm, cm, m, km
	**MASS (how heavy)**	scale · g, kg
	**CAPACITY (how much it holds)**	measuring cup · mL, L
	**TEMPERATURE (how hot or cold)**	thermometer · °C, °F
	**TIME (how long it takes)**	clock, calendar · minutes, days

MOVE! Thermometer body! Dad says a temperature: 0 °C = crouch and shiver; 20 °C = stand normally; 40 °C = jump and fan yourself!

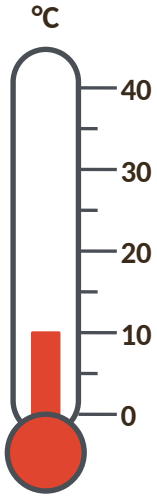

Duel 6: Master Neve and Thermion

MOVE! Thermion freezes and burns! Do the thermometer body (crouch, stand or jump) for each temperature before you tick.

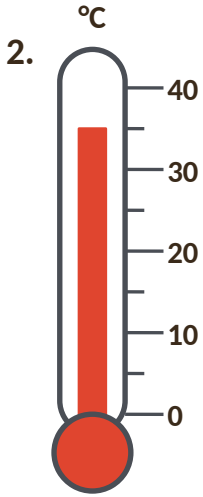

Read the thermometers

1.

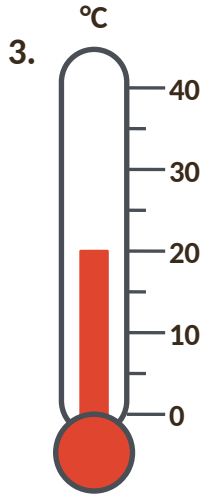

- ☐ 10 °C
- ☐ 20 °C

2.

- ☐ 30 °C
- ☐ 35 °C

3.

- ☐ 20 °C
- ☐ 40 °C

Tools, units and temperatures

4. Temperature tells us:	☐ how heavy	☐ hot or cold
5. Tool for temperature:	☐ thermometer	☐ ruler
6. °C means:	☐ centimeters	☐ degrees Celsius
7. Which is hotter?	☐ 35 °C	☐ 15 °C
8. A cold day:	☐ 35 °C	☐ 5 °C
9. Mass of an apple:	☐ scale (g)	☐ thermometer
10. Water in a jug:	☐ ruler (cm)	☐ cup (mL)

REWARD: Temperature Tamer Badge

+10 crystals

DUEL WON!

Thermion joins your team. Tick Master Neve on the League map (page 2).

Mission 7: Counting Brazilian money

FIND! Ask Dad for some real coins. Sort them from the smallest value to the biggest value!

Coins and notes of the real (R$)

5 centavos	10 centavos	25 centavos	50 centavos	1 real	R$ 2,00	R$ 5,00	R$ 10,00	R$ 20,00
R$ 0,05	R$ 0,10	R$ 0,25	R$ 0,50	R$ 1,00				

Remember

100 centavos = 1 real (R$ 1,00)
2 coins of 50 centavos = R$ 1,00
4 coins of 25 centavos = R$ 1,00
10 coins of 10 centavos = R$ 1,00
We write: R$ 1,75 = 1 real and 75 centavos.

How to count money

R$ 1,00 **R$ 1,50** **R$ 1,75** **R$ 1,85**

Start with the biggest value, then count on: 1 real... 1,50... 1,75... 1,85. Total: R$ 1,85.

MOVE! Coin hunt! Dad hides 6 coin cards around the room. Find them all, put them in order from the biggest value and count the total out loud.

Mission 7: Adding, subtracting and making change

TALK! You pay R$ 5,00 for a juice that costs R$ 3,00. What does the cashier give back to you?

Moedon's Legend Shop

pencil R$ 2,00

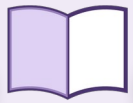

eraser R$ 1,50

juice R$ 3,00

apple R$ 0,75

book R$ 8,00

ball R$ 10,00

Adding money (+)

pencil + eraser
R$ 2,00 + R$ 1,50 = R$ 3,50

Add the reais, then add the centavos.
apple + apple: 75 + 75 centavos = 150 centavos = R$ 1,50

Subtracting money (–)

You have R$ 10,00 and buy a book.
R$ 10,00 – R$ 8,00 = R$ 2,00

Subtract to find what is left.

Making change

Change = the money you give – the price
A snack costs R$ 3,50, you pay R$ 5,00:
count up from 3,50
+ 50 centavos → 4,00
+ 1 real → 5,00
Change: R$ 1,50

MOVE! Shop game! Put the price cards on objects at home. Dad buys something and pays you with the money cards: count up and give him the right change!

Duel 7: Master Cofre and Moedon

MOVE! The final duel! Use the money cards: put the coins on the table, count them out loud and then tick.

How much money?

1. 1 real = ☐ 10 centavos ☐ 100 centavos

2. 

☐ R$ 1,75 ☐ R$ 1,50

3. 

☐ R$ 0,55 ☐ R$ 0,65

4. 

☐ R$ 8,00 ☐ R$ 7,00

5. 25-centavo coins in R$ 1,00: ☐ 4 ☐ 5

Shop, add and give change (page 16)

6. pencil + juice = ☐ R$ 5,00 ☐ R$ 6,00

7. eraser + apple = ☐ R$ 2,15 ☐ R$ 2,25

8. R$ 10,00 − R$ 8,00 = ☐ R$ 2,00 ☐ R$ 3,00

9. Juice R$ 3,00, you pay R$ 5,00. Change: ☐ R$ 8,00 ☐ R$ 2,00

10. Eraser R$ 1,50, you pay R$ 2,00 Change: ☐ R$ 0,50 ☐ R$ 1,50

11. Ball R$ 10,00, you pay R$ 20,00 Change: ☐ R$ 30,00 ☐ R$ 10,00

REWARD: Money Master Badge

+10 crystals

DUEL WON!

Moedon joins your team. Tick Master Cofre on the League map (page 2).

CONGRATULATIONS, LEGEND MASTER ISABEL!

You won all 7 duels and the 7 legendary creatures joined your team!

You trained: equal parts and fraction names (halves to tenths), numerator and denominator, fractions of a length, fractions of a set, the calendar, temperature, Brazilian coins and notes, adding and subtracting money and making change.

★ 7/7 BADGES • 70 CRYSTALS • READY FOR NOVEMBER 18! ★
